### Projects:

#### ● Athletic Event

Stack: React, Node.js, Express, MongoDB, Firebase Auth, JWT

🔗 [Live](#) | [Code](#)

- Event booking platform with user and organizer dashboards.
- Protected routes using JWT; Firebase for authentication.
- Features include event listing, booking, and event management.

#### ● Freelance Task

Stack: React, Node.js, Express, MongoDB, Firebase Auth, JWT

🔗 [Live](#) | [Code](#)

- MERN-based freelance task platform with secure JWT-authenticated routes.
- Role-based dashboards for buyers and sellers with task management features.
- Firebase used for authentication; backend API handles full CRUD.

### About Me:

Hello, I'm Rahul — a dedicated and passionate web developer driven by creativity and resilience. As a person with a physical disability, I've chosen web development not just as a career, but as a personal mission to build accessible and inclusive digital experiences. I reached this point through self-motivation and a strong desire to learn, especially since other types of work weren't physically feasible for me.

I specialize in crafting clean, visually engaging user interfaces with smooth, intuitive navigation. My focus is on creating websites that don't just look good — they feel right and work for everyone. Every project I take on is a chance to grow, adapt, and contribute meaningfully using the skills I've worked hard to develop.

I believe limitations can lead to innovation, and I'm excited to keep building, learning, and making a difference in the digital space.
